
Rotosonic

Available in December 2022

Features:

- Front loading rotary table machine
- 24" Diameter multi-position agitation table
- Part processing envelope- 24" diameter x 20" tall
- Weight Capacity 300 lbs.
- 40" process table load/unload height
- Four (4) custom recipe programmable
- Single point load/unload station
- Stainless steel construction
- Manually operated hinged load door with gas spring assistance, clamp latch, and safety interlock switch
- 50 GPM solution pump
- 145-gallon solution tank capacity
- Removable pump protection screen
- Single stainless steel solution filter
- Automatic tank water makeup
- Electric solution tank heating @ 140°F - temperature control through HMI via thermocouple card
- 2880 Watts at 40KHZ Ultrasonics
- Belt type oil skimmer – solution tank oil removal
- Stainless steel spray bars
- Stainless steel Vee-Jet spray nozzles
- NEMA 12 Single door electrical panel
- Unitronics V350 controller and Unitronics HMI Color Touchscreen
- High / Low temperature process detection
- 7 Day programmable timer included for preheating tanks
- Comprehensive diagnostics and alarms in HMI
- Emergency stop pushbutton.

Footprint: 4'-8" OAL x 4'-2" OAW x 7'-2" High"
